

Enterprise Simple Portal™

Third-Party Application Programming Interface

Simple. Simplicity drives productivity. Our #1 advantage is that users feel comfortable with our software. This results in your team getting their work done as quickly as possible.

Powerful. Our solutions are built for performance and scalability, with industry-standard technologies that reach out to your entire organization and work with your enterprise software systems.

Flexible. We respect that every organization is unique. Our solutions can work off-the-shelf, or they can be easily tailored to your unique processes and workflows.

The Enterprise Simple

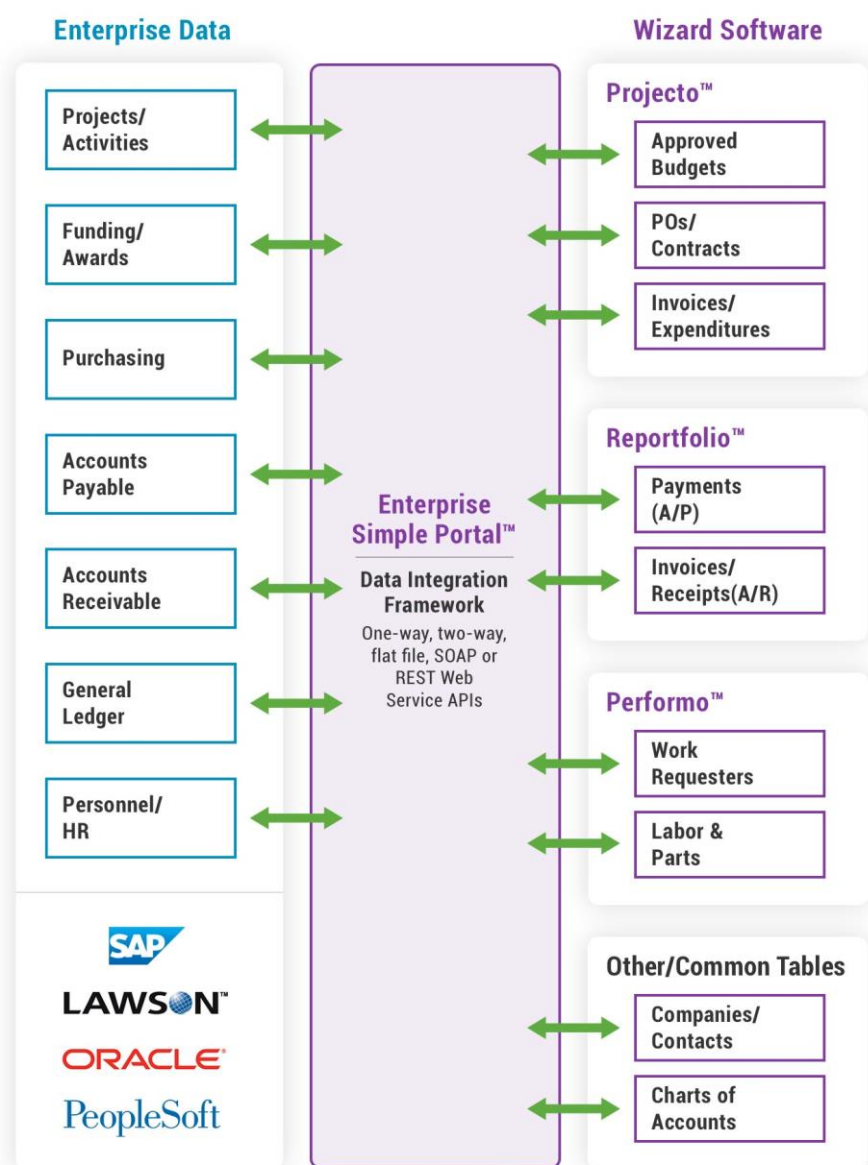

Portal™ (ESP) from Wizard Software is a software framework and API which is the foundation for integration between any Wizard Software solution and your enterprise data.

- ESP™ is designed to give Wizard Software programmers a head-start to dramatically accelerate the time required to build a connection between your Wizard Software solution and your enterprise.
- ESP™ is commonly used to connect between Wizard Software and financial/ERP data from systems like Oracle, PeopleSoft, Lawson, and SAP.
- ESP™ also makes it easy for your data administrators to connect and build your own interfaces with Wizard Software application data.

"It's a new experience for us to have something that does what we want and that we are excited about using."

Sue Taylor

City Real Estate Supervisor

The Wizard Software Enterprise Simple Portal™ provides a transparent, efficient, effective, and secure method to exchange or synchronize the latest financial/ERP data between your workgroup and your enterprise software.

ESP™ Features & Functionality

Flexible Deployment Options

On-Premise

Installed and deployed on your own servers, behind your firewall. Still supported 100% by your experienced Wizard Software professional services staff.

On-Demand

Secure access from anywhere 24x7x365 and superior performance in the Cloud with minimal to zero resources needed from your already tapped IT department. Your data is owned 100% by you.
